

Nonhuman Primate Study NEWSLETTER

2024 Q1

PRISYS
Better Human Health by Primate Translational Sciences

Integration of NHP Supply-chain

Youlink Biotech Co., a Prisms subsidiary firm specialized in experimental Nonhuman Primate (NHP) breeding, started operation in early 2023, and is by far the southern-most NHP center in China. The original habitat environment provides cost-effective and high-welfare NHP breeding. The colony supports long-term experimental plans for collaborators of Prisms.

GLP-studies in NHP and other species

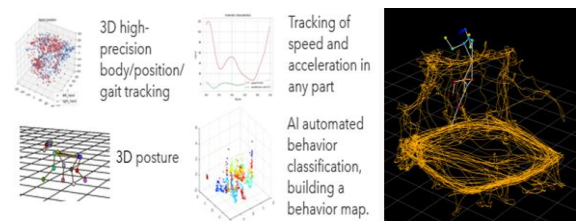

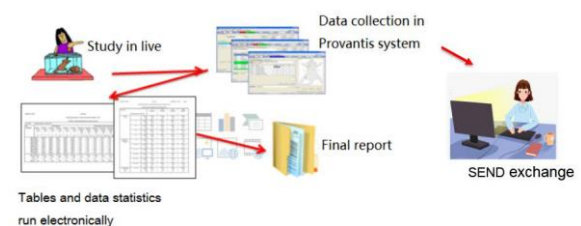

Business integration with a local leading institute, experienced and qualified in both USFDA/OECD submission for INDs.

Strategies for organ-targeted drug delivery

Specialized technologies in large animals, enabling multi-organ administration to enhance PD, efficacy, and transformation.

Breakthrough on CNS research in NHP

Advanced technologies combining the use of AI-algorithm, high-speed photography, brain mapping & navigation etc., drive neuro-disorder therapy R&Ds to the next level.
